

Harper Woods Middle School

Here Is WHY Your Child Should Attend HWMS

Harper Woods Middle School is “Ready to Engage, Educate, and Empower ALL Students” OUR students are taught to research, synthesize, and analyze real-world problems.

International Baccalaureate Middle Years Programme (MYP) The MYP is designed to help students recognize the connection between what they learn in the classroom and the world around them. Students tie various subject areas together and eventually see knowledge as a inter-related, coherent whole. Students in the MYP analyze and evaluate issues, generate new ideas, and consider new perspectives. MYP students are empowered to develop a sense of community through service to others, while encouraging international-mindedness through appreciation and inquiry of global cultures. Overall, students will become creative, critical, and reflective thinkers (ibo.org).
